Confidea 2D2D G3

Confidea G3 Wireless Twin Delegate Discussion Unit

Description

The 3rd generation of Confidea® has an innovative wireless engine that integrates the latest technological evolutions in wireless communication. It offers an even more robust transmission link and more available frequencies in various countries. The new engine is also much more power-efficient. That's why Confidea G3 has a longer operating autonomy and requires recharging far less frequently.

> The Confidea 2D2D G3 offers two delegates one shared microphone and both a microphone button. This button activates the microphone instantly, or – in 'Request' mode – after the chairperson provides the delegate the right to speak.

The microphone (sold separately) is attached to the unit with a screw-lock connector and is immune to mobile phone interference.

New in this generation is the simplified button layout with a reduced number of physical buttons. It offers delegates a less cluttered, more intuitive user interface so they can focus on what's important without technology getting in the way.

The Confidea family of products uses Li-ion (Lithium-ion) batteries, the best type of battery technology for frequently used and rechargeable electronic equipment. Found in smartphones and tablets, this mature battery technology offers rapid recharging without the need for a full discharge. Li-ion batteries also have a longer lifespan with hardly any deterioration of the battery performance. Combined with the smart power management built into Confidea, the batteries will offer maximum autonomy for a very long time.

To prevent eavesdropping and unauthorized access, the Confidea system has built-in AES encryption. This ensures the confidentiality of your meeting and protects the privacy of your delegates at all times.
